OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Fort Polk in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections. The MCX did not physically verify the existence of collections and, as such, the information contained in this report is based on background record reviews and information obtained via telephone interviews with the aforementioned installation personnel and institution professionals.

Archival research for Fort Polk began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Louisiana Department of Culture, Recreation and Tourism in Baton Rouge, Louisiana. The records search was conducted in December 1994 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. Draft Section 6 Summary letters are enclosed for each of these tribes (Appendix I), as well as a listing of the current tribal chairperson (Appendix II).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT FORT POLK

Significant archaeological work began on Fort Polk in the late 1970s. At that time, several firms and institutions began surveys of the fort's property. Archaeological surveys and testing on Fort Polk continue to the present. Firms which have conducted investigations on Fort Polk include the following:

Commonwealth Associates, Jackson, Michigan
Earth Search Incorporated, New Orleans, Louisiana
Environmental and Cultural Services, Inc., San Antonio, Texas
Garrow and Associates, Atlanta, Georgia
R. Christopher Goodwin and Associates, New Orleans, Louisiana
Louisiana Department of Transportation, New Orleans, Louisiana
New South Associates, Stone Mountain, Georgia
New World Research (Prentice Thomas Associates), Ft. Walton Beach, Florida
Northeast Louisiana University, Monroe, Louisiana
Northwest Louisiana University, Natchitoches, Louisiana
South Carolina Institute of Anthropology and Archaeology (SCIAA), Columbia,
South Carolina
University of Southwestern Louisiana, Lafayette, Louisiana
University of Texas, San Antonio, Texas

Investigations consisted of systematic surveys, test excavations, and excavations to mitigate adverse effects on sites where necessary for the installation's mission.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

Approximately 285 ft³ of boxed archaeological materials and more than 59 linear feet of associated documentation have been identified for Fort Polk. Artifacts include prehistoric lithics, ceramics, vertebrate and invertebrate fauna, floral remains, flotation and soil samples, as well as historic materials. In a telephone conversation on 26 June 1995, Mr. Jim Grafton, the fort cultural resource manager, reported a human tooth as the only human remains presently curated on post.

As of July 1995, the collections are located in the following repositories:

Fort Polk Curation Facility	approx. 205 ft ³ of artifacts and 47 linear feet of records
University of Texas at San Antonio	52 boxes of artifacts and an unknown quantity of records
R. Christopher Goodwin and Associates	11 ft ³ artifacts and 12 ft ³ records
Louisiana Dept. of Culture, Recreation and Tourism, Baton Rouge	405 artifacts
New South Associates	1 soil sample
Prentice Thomas and Associates	6 ft ³ of artifacts
SCIAA	11 boxes of artifacts and records

There are two potential problems that were revealed during the archival research conducted by MCX personnel. First, specifically which collections are curated at the Fort Polk Curation Facility could not be determined with respect to individual projects or contractors at the time of this report. Second, some of the materials curated at the Fort Polk Curation Facility may have been recovered from sites on Kisatchie National Forest lands. Several of the projects were conducted on land that, although used by Fort Polk, is owned by the U.S. Forest Service. In addition, some of the site records attributed to Fort Polk indicated that the land on which the sites were located was owned by the Fort Worth District of the U.S. Army Corps of Engineers or by a private individual, or no land owner was indicated. Appendix IV contains a list of sites which the site files indicate are owned by an entity other than the U.S. Army.

These problems will be addressed during the physical inventory of the collections for human skeletal material as required by NAGPRA. Collections at the Fort Polk Curation Facility will be reviewed to determine which projects have materials curated there and whether any materials from sites on land not owned by the U.S. Army are included in the collections.

The attached *Summary of Current Locations of Archaeological Collections from Fort Polk* (Appendix III) provides detailed information about each collection derived as a result of archaeological investigations at the installation. A collection consists of all of the materials, artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well.

Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

NAGPRA Related Materials

One possible human tooth has been identified among the collections curated at Fort Polk. MCX research did not identify any other human remains, funerary, or sacred objects during its review of archaeological records, associated literature, and telephone interviews for Fort Polk. The final determination of sacred objects or objects of cultural patrimony may be established through consultation with Native American tribes that have met the definition of culturally affiliated tribes and/or lineal descendants and for the objects specified by law in NAGPRA.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Three sets of references regarding archaeological work conducted on Fort Polk are attached: Appendix V contains the list of references reviewed by the MCX during its archival research; Appendix VI is the list of references contained in the National Archeological Data Base (NADB); and Appendix VII provides the references cited in the literature but not available for review by the MCX.

NATIVE AMERICAN TRIBES ASSOCIATED WITH FORT POLK

The area occupied by Fort Polk was not adjudicated during the 1978 Indian Land Claims cases. However, the tribe with adjudicated lands in closest proximity to the fort (approximately 90 miles to the north) are the Caddo (U.S.G.S. n.d.). The Alabama-Coushatta Indian Reservation, the Coushatta Indian Reservation, the Chitimacha Indian Reservation, and the Tunica-Biloxi Indian Reservation are located within 120 miles of Fort Polk (U.S.G.S. n.d.).

According to Hampton (1994), the Caddo's ancestral land included areas in western Louisiana, Arkansas, eastern Texas and Oklahoma. Although eastern Texas and southwestern Arkansas were the core areas of the Caddo culture area, Hodge indicates that the Caddo were also settled along the lower Red River in what is now Louisiana as early as the 1600s (Hodge 1912:179). Some Caddo were located along the banks of the Sabine River in western Louisiana as well (Hampton 1994). In 1835, the Caddo ceded their lands in Louisiana to the state and joined the Caddo living in Texas (Hampton 1994).

The Alabama originally inhabited the region along the Alabama River (Waldman 1988). After the French and Indian War, many were forced to leave their homeland. Some Alabama settled north of New Orleans and eventually moved to western Louisiana. The majority of displaced Alabama moved to Texas where they joined the Coushatta. Because of the transitional nature of their presence in western Louisiana, Alabama occupation sites would be limited to a period in the late 1700s to mid-1800s. Today, this group is called the Alabama-Coushatta, or Koasati, (Moore 1994) and they occupy a reservation in Texas (U.S.G.S. 1993).

The Coushatta originally lived in the same geographic region as the Alabama with whom they are closely related. According to Waldman (1988) they also were displaced after the French and Indian War. Their tenure in the area of the installation is contemporaneous with that of the Alabama. In addition to the reservation shared with the Alabama in Texas, some Coushatta relocated to Louisiana (U.S.G.S. 1993), others joined the Alabama-Quassarte in Oklahoma.

In addition to these groups, Waldman (1988:242) and Hudson (1976:497) depict the Tunica-Biloxi as having been historically located along the eastern border of Louisiana. The Tunica and Biloxi were once separate tribes which fused in the 1920s (Gregory 1994b). According to Johnson (1993) some Biloxi settled in the Red River area near Marksville, Louisiana after 1763. The Tunica also entered this area some time in the late eighteenth century (Johnson 1993). Currently, the Tunica-Biloxi have a reservation in eastern Louisiana (U.S.G.S. 1993). The Tunica-Biloxi may be considered peripheral to the Fort Polk area.

The Chitimacha were historically located in the extreme southern portion of the state (Hudson 1988:497; Gregory 1994a). According to Hodge (1912) they lived along Grand Lake and Grand River in Louisiana. The Chitimacha have a reservation in southern Louisiana (U.S.G.S. 1993). Again, barring incursions by hunting parties or other transitory occupations, it is unlikely that the Chitimacha occupied the area of the installation.

According to Swanton (1922) some Choctaw lived throughout what is now Mississippi, southwestern Alabama, and parts of Louisiana before their removal to Oklahoma in the 1880s, where they now have a reservation in Durant. A second Choctaw tribe, the Jena Band of Choctaws, are located in Louisiana and recently received federal recognition (Bureau of Indian Affairs 1995:3).

The Caddo, Alabama Coushatta, Alabama-Quassarte, and Coushatta are the federally recognized tribes aboriginally located in closest geographical proximity to Fort Polk. The Chitimacha, Choctaw, and Tunica-Biloxi may have been located historically in areas peripheral to the fort.

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans and with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. All tribes previously mentioned as being aboriginally in geographic proximity to the lands occupied by Fort Polk are federally recognized. Enclosed are draft NAGPRA Section 6 Summary letters (Appendix I) and a list of the tribal chairpersons from the federally recognized tribes which may be culturally affiliated with the collections (Appendix II).

Several groups are currently petitioning the Bureau of Indian Affairs for federal recognition. Three Choctaw groups are pursuing recognition: the MOWA Band of Choctaw received a proposed negative finding on their petition on 5 January 1995, but are in the process of making comments on the finding (Bureau of Indian Affairs 1995:2); the Clifton Choctaw of Louisiana have filed an incomplete petition; and the Choctaw-Apache Community of Ebarb, Louisiana have filed a letter of intent to petition (Bureau of Indian Affairs 1995:5). The Caddo Adais Indians, Inc. of Louisiana have filed a letter of intent to petition (Bureau of Indian Affairs 1995:7).

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER FOR FORT POLK, LOUISIANA

[Installation Header]

Mr. Roland Poncho, Chairperson
Alabama-Coushatta Tribal Council
Route 3, Box 64
Livingston, Texas 77351

Dear Mr. Poncho:

I am writing to inform you of collections held by Fort Polk that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Alabama-Coushatta. Fort Polk has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Polk is responsible for approximately 285 ft³ of collections housed at seven known repositories. These archaeological collections were generated from surveys and/or excavations conducted from the 1970s to the present. The collections consist of prehistoric stone tools, ceramics, animal bones, invertebrate fauna, floral remains, soil samples, and historic Euro-American materials such as ceramics, metal, and glass. Also included in the collection are all associated documentation such as field notes, photographs, and correspondence.

We are notifying the Alabama-Coushatta because some of these materials were found in or near the area thought to be part of the territory used historically by the Alabama-Coushatta. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

In the process of completing our Section 6 Summary, a possible human tooth was reported among the collections from Fort Polk and is currently being curated at the Fort Polk curation facility. This item is not assigned to any particular project or site, but is only listed as being in the collection.

Therefore, by means of this letter we are also initiating consultation regarding the NAGPRA Section 5 Inventory investigation. Fort Polk is scheduled to conduct Section 5 Inventory investigations of possible human remains in mid-1996. If the Alabama-Coushatta wish to comment on, or participate in, the Section 5 Inventory process, please respond within 60 days of receipt of this letter.

Please feel free to contact [Installation POC, title] at [telephone number] regarding any of these issues.

To facilitate discussions between Fort Polk and the Alabama-Coushatta on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

Mr. Hollis E. Roberts, Chief
Choctaw Nation of Oklahoma
P.O. Drawer 1210
16th and Locust Street
Durant, Oklahoma 74702

Dear Mr. Roberts:

I am writing to inform you of collections held by Fort Polk that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Choctaw. Fort Polk has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Polk is responsible for approximately 285 ft³ of collections housed at seven known repositories. These archaeological collections were generated from surveys and/or excavations conducted from the 1970s to the present. The collections consist of prehistoric stone tools, ceramics, animal bones, invertebrate fauna, floral remains, soil samples, and historic Euro-American materials such as ceramics, metal, and glass. Also included in the collection are all associated documentation such as field notes, photographs, and correspondence.

We are notifying the Choctaw because some of these materials were found around, the area thought to be part of the territory used historically by the Choctaw. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

In the process of completing our Section 6 Summary, a possible human tooth was reported among the collections from Fort Polk and is currently being curated at the Fort Polk curation facility. This item is not assigned to any particular project or site, but is only listed as being in the collection.

Therefore, by means of this letter we are also initiating consultation regarding the NAGPRA Section 5 Inventory investigation. Fort Polk is scheduled to conduct Section 5 Inventory investigations of possible human remains in mid-1996. If the Choctaw wish to comment on, or participate in, the Section 5 Inventory process, please respond within 60 days of receipt of this letter.

Please feel free to contact [Installation POC, title] at [telephone number] regarding any of these issues.

To facilitate discussions between Fort Polk and the Choctaw on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

Dr. Jerry Jackson
Jena Band of Choctaw
P.O. Box 14
Jena, Louisiana 71342-0014

Dear Dr. Jackson:

I am writing to inform you of collections held by Fort Polk that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Choctaw. Fort Polk has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Polk is responsible for approximately 285 ft³ of collections housed at seven known repositories. These archaeological collections were generated from surveys and/or excavations conducted from the 1970s to the present. The collections consist of prehistoric stone tools, ceramics, animal bones, invertebrate fauna, floral remains, soil samples, and historic Euro-American materials such as ceramics, metal, and glass. Also included in the collection are all associated documentation such as field notes, photographs, and correspondence.

We are notifying the Choctaw because some of these materials were found around, the area thought to be part of the territory used historically by the Choctaw. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

In the process of completing our Section 6 Summary, a possible human tooth was reported among the collections from Fort Polk and is currently being curated at the Fort Polk curation facility. This item is not assigned to any particular project or site, but is only listed as being in the collection.

Therefore, by means of this letter we are also initiating consultation regarding the NAGPRA Section 5 Inventory investigation. Fort Polk is scheduled to conduct Section 5 Inventory investigations of possible human remains in mid-1996. If the Choctaw wish to comment on, or participate in, the Section 5 Inventory process, please respond within 60 days of receipt of this letter.

Please feel free to contact [Installation POC, title] at [telephone number] regarding any of these issues.

To facilitate discussions between Fort Polk and the Choctaw on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

Mr. Lovelin Poncho, Chairman
Coushatta Tribe
P.O. Box 818
Elton, Louisiana 70532

Dear Mr. Poncho:

I am writing to inform you of collections held by Fort Polk that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Coushatta. Fort Polk has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Polk is responsible for approximately 285 ft³ of collections housed at seven known repositories. These archaeological collections were generated from surveys and/or excavations conducted from the 1970s to the present. The collections consist of prehistoric stone tools, ceramics, animal bones, invertebrate fauna, floral remains, soil samples, and historic Euro-American materials such as ceramics, metal, and glass. Also included in the collection are all associated documentation such as field notes, photographs, and correspondence.

We are notifying the Coushatta because some of these materials were found in, or around, the area thought to be part of the territory used historically by the Coushatta. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

In the process of completing our Section 6 Summary, a possible human tooth was reported among the collections from Fort Polk and is currently being curated at the Fort Polk curation facility. This item is not assigned to any particular project or site, but is only listed as being in the collection.

Therefore, by means of this letter we are also initiating consultation regarding the NAGPRA Section 5 Inventory investigation. Fort Polk is scheduled to conduct Section 5 Inventory investigations of possible human remains in mid-1996. If the Coushatta wish to comment on, or participate in, the Section 5 Inventory process, please respond within 60 days of receipt of this letter.

Please feel free to contact [Installation POC, title] at [telephone number] regarding any of these issues.

To facilitate discussions between Fort Polk and the Coushatta on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

Mr. Earl Barbry Sr., Chairman
Tunica-Biloxi Tribe of Louisiana
P.O. Box 331
Mansura, Louisiana 71351

Dear Mr. Barbry:

I am writing to inform you of collections held by Fort Polk that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Tunica-Biloxi. Fort Polk has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Polk is responsible for approximately 285 ft³ of collections housed at seven known repositories. These archaeological collections were generated from surveys and/or excavations conducted from the 1970s to the present. The collections consist of prehistoric stone tools, ceramics, animal bones, invertebrate fauna, floral remains, soil samples, and historic Euro-American materials such as ceramics, metal, and glass. Also included in the collection are all associated documentation such as field notes, photographs, and correspondence.

We are notifying the Tunica-Biloxi because some of these materials were found near the area thought to be part of the territory used historically by the Tunica-Biloxi. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

In the process of completing our Section 6 Summary, a possible human tooth was reported among the collections from Fort Polk and is currently being curated at the Fort Polk curation facility. This item is not assigned to any particular project or site, but is only listed as being in the collection.

Therefore, by means of this letter we are also initiating consultation regarding the NAGPRA Section 5 Inventory investigation. Fort Polk is scheduled to conduct Section 5 Inventory investigations of possible human remains in mid-1996. If the Tunica-Biloxi wish to comment on, or participate in, the Section 5 Inventory process, please respond within 60 days of receipt of this letter.

Please feel free to contact [Installation POC, title] at [telephone number] regarding any of these issues.

To facilitate discussions between Fort Polk and the Tunica-Biloxi on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

APPENDIX III

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM FORT POLK, LOUISIANA

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY:	The current location in which the collection is stored, as of the date of this report.
REPOSITORY POC:	The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
TELEPHONE:	The telephone number for the repository POC.
COLLECTION ID:	The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
SITE NUMBERS:	The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
FIELDWORK DATES:	The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.

EXCAVATOR/COLLECTOR:	The individual and/or organization that conducted the investigation.
COLLECTION SIZE:	The volume or number of objects in a collection, estimated by the repository POC or from project reports.
DESCRIPTION OF MATERIALS:	General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.
ANTIQUITY/ARCH. PERIOD:	Chronological or cultural-historical designations recorded on site records or in references specific to the collection.
CULTURAL AFFILIATION:	This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.
BASIS OF DETERMINATION:	Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).
SECTION 5 MATERIALS:	Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

APPENDIX IV

SITES LOCATED ON JOINT-USE/LEASED LANDS

The following list includes all recorded sites located within the mapped boundaries of Fort Polk for which the land owner designated on the site form was not the U.S. Army. These sites include those on U.S. Forest Service land being used by Fort Polk. Each category of sites begins with the designated land owner and tenant (where applicable) in bold type.

(Note: Site revisit forms are marked with an asterisk after the site number.)

Land Owner: U.S. Army Corps of Engineers, Ft. Worth District

APPENDIX V

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, or in instances where the author is a company rather than an individual, the company name is listed here.
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.
